Suneel Kanuri

Cloud Solution Architect | Azure | High-Performance Applications
Fort Mill, South Carolina, United States

Summary

Delivery focused and highly motivated technology architect with hands-on experience in system architecture and cloud computing.

Currently working as a lead software engineer / architect for Enterprise Knowledge Base (EKB) team, assisting the development team and other associated teams deliver Fast, Secure, Reliable and Easy to maintain applications

Skill set: Application / System Architecture, .NET Core, Azure, AWS, RDF, SPARQL, Cosmos DB, C#, Kubernetes, REST API, JavaScript, Service Bus, App Insights

Experience

Self

Senior Application Architect

April 2023 - Present (2 years 11 months)

- Facilitate integration of AI and ML to web apps, transforming them to truly intelligent apps that drive impactful business outcomes, utilizing RAG, Genie Spaces and Databricks
- Establish and mold the Architecture and methodologies
- Conduct application quality and performance evaluations
- Direct and navigate vendor discussions regarding architectural needs for new application development.
- Assess technologies and products for varied requirements in the org and develop proof-of-concept projects to expedite application development initiatives.
- Assist in product development by spinning up starter and demo projects with all involved technologies, to be adopted for further development by the Dev team
- Support product development teams in optimizing source code, debugging issues and in solving challenges encountered.

GlobalLogic

Cloud Solution Architect

November 2020 - April 2023 (2 years 6 months)

Charlotte, North Carolina, United States

- Architected Highly-Available solutions in Azure primarily using Azure Functions, Azure Kubernetes Service, App Services, Event Grid, Event Hub (Kafka), Azure API Management, Azure Traffic Manager and Service Bus
- Designed & Implemented an efficient search mechanism with facets, across our datastores (Cosmos DB, SQL Server and GraphQL data from TopQuadrant) using Azure Cognitive Services and Azure Redis Cache
- Automated infrastructure components using ARM Templates, Terraform and Azure CLI along with Python scripts.
- Managed and Monitored Applications and API's using Application Insights, alerts, Azure Monitor and Log Analytics.
- Managed Identities using OAuth2 and Azure Active Directory
- Secured Applications using Azure KeyVault, NSG (Firewalls), Access restrictions, Service Endpoints, Azure Application Gateway and VNet Peering
- Assisted the higher management transform the strategic initiatives to desired outcomes and realize business value by driving delivery teams focused towards achieving those outcomes.
- Guided the team by providing necessary technical guidance, leadership and architecture in building scalable cloud native microservices on Azure
- Worked with DevOps teams in setting up Azure Pipelines for efficient and continuous delivery (CI/CD) of our products
- Performed non-functional requirement analysis namely response time, security, scalability and stability
- Explored new age technologies such as RDF (Graph Data), SPARQL and built POC products to kick start the team in building innovative solutions that meet the client's diverse business needs

AGDATA, LP

1 year 9 months

Technical Lead

September 2019 - November 2020 (1 year 3 months)

Charlotte, North Carolina Area

- Lead the team by providing necessary technical guidance, leadership and removing blockers
- Organized scrums & worked as a Scrum master, to ensure the success of daily standups, backlog grooming and sprint planning with a eye towards improving the sprint capacity & team confidence

- Worked closely with the Development and QA teams on architecture and technologies.
- Performed root cause analysis for service interruption recovery and established preventative measures for future.
- Worked on creating Azure Pipelines, Releases and Test Plans to implement CI/CD for the products managed by my team. Coached our engineering teams on CI/CD and Azure.
- Created and deployed Terraform Scripts, ARM templates and Powershell scripts for resource management in Azure
- Worked on defining API contracts, and implemented Microservices for our internal and external clients while also enforcing the best compliance with REST standards
- Refactored & Assisted other team members in upgrading older .NET projects to a distributed microservices architecture for better scaling and to utilize the latest versions of .NET Core while also introducing design patterns and Unit tests.

Senior Software Engineer / Architect

March 2019 - September 2019 (7 months)

Charlotte, North Carolina Area

- Developed software, Microservices and Windows services using C# (.NET Core), ASP.NET Core and SQL Server
- Containerized applications using Docker Images and orchestrated scaling using Kubernetes (Google Kubernetes Engine and Azure Kubernetes Service)
- Utilized best architectural practices such as Loose-Coupling (using Service Bus) and SOLID principles.
- Designed multi-node microservice applications using Azure Service Fabric, and Service Bus (Queue) with CQRS architecture
- Utilized Azure based cloud services such as ServiceBus, Blob Containers, , Resource Groups, Namespaces and Application Insights
- Performed Application migrations to Azure Devops, Azure Repos (from Bitbucket and Github), and setup Azure Pipelines for Releases and Builds
- Migrated nuget packages from our local Nuget server to Azure Artifacts, and setup multiple feeds for different teams
- Developed Infrastructure as code (IaaS) scripts for configuration management using software like Terraform, ARM templates and Powershell
- Reviewed & implemented test plans, to ensure the best Unit test coverage
- Reviewed & Refactored solutions for scalability, and maximum availability
- Designed and utilized Azure Cosmos DB tables to speed up reporting on MDM data for Growers and Retailers

- Assisted in performing phone & on-site interviews for technical & product management resources
- Encouraged & participated in implementing TDD practices (red/green strategies) within the team

Blue Streak Technologies

Lead Software Engineer

May 2010 - March 2019 (8 years 11 months)

Baton Rouge, Louisiana Area

- * Technical Lead over SANDY INTEGRATED RECOVERY OPERATIONS AND MANAGEMENT SYSTEM ("SIROMS") team that provides Workflow solutions for RREM Program,LMI, LRRP among others using OpenText, C#.NET, RESTful API, SOAP, Javascript, Node.js, JQuery, JSON, iTextSharp and Cloud based document management.
- * Architected and developed Matter & Event Management Solution for Legal Clients using AWS Lambda (in Node.js), AngularJS, AWS API Gateway, AWS MySQL, AWS Elasticache, AWS Cognito, Javascript, Eclipse and Maven (AWS toolkit for Eclipse) . Integrated it with AWS SQS for Task Management, and AWS S3 for Document Management and AWS SES
- * Designed, configured and deployed Amazon Web Services for a multitude of applications using the AWS stack (EC2, Lambda, S3, RDS, DynamoDB, CloudFormation, CloudWatch, SQS & IAM) focusing on high availability, fault tolerance, auto-scaling and DR.
- * Designed and Developed Secret Management Solution to manage shared team resources & avoid conflicts by employing the "Token Passing" methodology using Python (for CLI client), AWS SDK (in Node.js), AngularJS, AWS EC2 (for Web app), AWS S3 and PGP Encryption.
- * Developed Automated testing solutions using Selenium and Python, to test Web apps and integrated Time Management solutions with Applications using Harvest API (Node.js), AngularJS, (RESTful API).
- * Lead the efforts to enforce Code standards, best practices, commenting standards and best deployment & release notes practices.
- * Migrated applications into AWS VPC securely utilizing public, private subnets, NAT Gateways and configuring Route tables.
- * Built POCs and demoed them to concerned stakeholders, customers and clients to get necessary approvals
- * Mentored the development team on AWS Services such as AWS EC2, AWS ElastiCache, AWS S3, AWS Kinesis, AWS SDK, AWS Lambda, AWS CloudFormation templates, AWS CloudFront, Route 53, Security Groups by introducing a Lunch-and-Learn Program and providing presentations

Ciber Inc.

Senior Business Process Management Consultant & Software Developer

April 2007 - April 2010 (3 years 1 month)

Baton Rouge, Louisiana Area

- * Designed & Developed Workflow solutions for City of New Orleans using PEGA BPM, IBM BPM and developed custom reports.
- * Developed Permit generation application (Cutstreet) using Java, Spring Boot Framework, RESTful API (Spring Data Rest) and iText Library (for PDF permits) while integrating it with ArcGIS systems for spatial data.
- * Enhanced and Supported LA Dept. of Revenue Applications such as Service Request System, Legal Case System, Rule Management System using C#.NET, iTextSharp, Javascript, JSON, Microsoft SQL and Oracle.
- * Designed and Developed a Program Performance Monitoring System, using PHP, MySQL and deployed it on a Apache HTTPD server. Designed custom PHP based reports using CSS, Javascript and built custom dashboards using D3.js
- * Assisted in the Development of LA Dept. of Revenue's, Tax Amnesty Program using ASP.NET, C#, Microsoft SQL Server and IIS.

GCR & Associates

Application Developer

August 2004 - March 2007 (2 years 8 months)

Greater New Orleans Area

- * Designed and Developed Elections Registration & Information Network (ERIN) using C#.NET. Integrated it with Microsoft Quickbooks for Invoice generation and issuing of payment checks.
- * Developed custom modules to integrate Seapine Test Track Pro software with our Project Management Systems.
- * Assisted in the architecture of the ERIN Database system
- * Developed ballots and voters list for polling booths, for over 2.5 million registered voters using Microsoft SQL Server Reporting Services.
- * Designed State Land and Buildings Inventory Management System (SLABS) using PHP and MySQL, deployed to a Apache Server.

Newtek Business Services

Application Developer

December 2003 - July 2004 (8 months)

Greater New York City Area

- * Developed Newtek CUNA (for credit unions) Micro-lending Program using PHP, Linux, Javascript and MySQL.
 - * Developed SOA web interface for Credit verification, and for Payment processing services using PHP
 - * Designed Custom Dashboards using Javascript, JQuery and D3.JS
- Optimized the most frequently used loan terms and credit score range tables using Memcached

Education

Louisiana State University and Agricultural and Mechanical College
Master's Degree, Computer Science · (2002 - 2003)

University of Madras
Bachelor's Degree, Computer Science & Engineering · (1997 - 2001)

MSN English Medium
High School · (1990 - 1995)
